

I learned that this hearing was going on tonight while I was cooking dinner for my family. It seems to me that this is an issue, such an important issue, that should have been advertised heavily and public input actively sought, not just in a few places, but all over the nation. I think it is a huge mistake to allow more consolidation of ownership and control over the air waves. I already have so few choices that I think model proper morals and values for my children, and I know lots of friends who feel the same. Please do not allow this to happen.
